The ways of teaching implemented by Miss Bartram have really aroused the interest of our students. In her class, students are also motivated to speak better English. Furthermore, students have learnt about the culture and customs of the English people. They have been taught to sing the English songs too. With her help in our school, we have discovered that some of our students have made great improvement in the English language. They have improved a lot on both speaking and writing skills. In the recent first term examination, we have found out that the results of the English subject subject are slightly improving.

To create an English speaking environment, an English reaching assistant is giving us a lot of help. We therefore sincerely hope that the Gap Organization will continue to send another new teaching-assistant to replace the post of Miss Bartram. We would also be grateful The Rotary Club will keep on supporting us and providing help for our school.
